App Core Modules

**Custom
Charts**

Build visual reports with 10 chart types — 1D, 2D charts, tables, and KPI tiles.

**Issue
List**

Professional interactive tables with Smart Labels, Quick Filters, and export

**Dynamic Filter
Controlled**

Command center for dashboard filtering — one bar controls all connected gadgets.

**Time in
Status**

Measure how long work spends in each stage. Identify bottlenecks with Cycle Time and Lead Time analytics.

**Pivot
Table**

Cross-tabulation with 9 display types, 7 aggregation methods, and drill-through to Jira issues

**Cumulative
Flow Diagram**

Visualize work flow across pipeline stages over time. Track WIP, spot bottlenecks & monitor sprint health.

WIP Aging Charts

Scatter plot showing how long in-progress work has been active. Flag SLA risks with configurable reference lines.

Key Differentiators

- ✓

Master Dashboard Control:
 Filter multiple connected charts and issue lists instantly with a single click. The Dynamic Filter Controller updates all seven gadgets simultaneously.
- ✓

Advanced Calculations & Reference Lines:
 Track performance against targets using Goal, Trend, Average, and Cumulative Total lines on any bar or line chart.
- ✓

Custom JQL Segmentation:
 Define custom chart segments using advanced JQL queries instead of basic field groupings. Overlapping segments assign each issue to the first matching segment only.
- ✓

10+ Chart Types (1D & 2D):
 Build pie, bar, line, funnel, and tile charts, plus advanced 2D matrix visualizations. Every chart type has full display customization.
- ✓

Time-Based Process Analytics:
 Measure Cycle Time, Lead Time, & status transition counts with the Time in Status gadget – powered by actual issue changelog data, not current state snapshots.
- ✓

Multi-Dimensional Pivot Analysis:
 Summarize any Jira data across up to 3 row fields and 3 column fields. Aggregate by count, sum, average, min, or max. Click any cell to drill through to the contributing issues.

Build For

- Project Managers.
- Engineering Teams
- Scrum Masters & Agile Coaches.
- Leadership & Executives
- QA & Release Managers
- IT & Admins.
