

Content Formatting Macros: Tabs Navigation Visibility CSS

1. Overview

As Confluence spaces grow, content becomes harder to navigate, pages become long and inconsistent, and attachments get scattered across spaces and pages. This app solves those problems by giving teams a complete toolkit to:

- Build **guided content hubs** with tabs or dropdown navigation.
- Make pages **more scannable and interactive** using formatting macros.
- Tailor what different audiences see using **Conditional show / Conditional hide** visibility rules.
- Manage attachments at scale using **Attachment Control Center**.

This app is designed for teams who want better Confluence documentation without manual maintenance or custom CSS.

2. What's Included

Tabs Navigation

Create hubs for browsing multiple sections on one page.

Includes:

- **Tab Parent Content Mapper:** generate tabs from a parent page's direct children.
- **Tab Label Content Mapper:** enter a label name - every page tagged with that label becomes its own separate tab.
- **Tab Confluence Page Mapper:** create a hub by selecting pages manually.
- **Create Custom Tabs:** create fully custom tabs with rich content & embeds.

Content Formatting Macros

Enhance pages with interactive macros (No CSS needed).

Common formatting capabilities:

- **Highlight** critical information.
- **Guide users** with call-to-actions.
- **Organize long pages** into collapsible sections.
- **Add visual structure** with banners, cards, and section backgrounds.
- **Show progress** across multi-step content.

32 macros include: Buttons, Alert, Background, Tooltip, Progress Bar, Footnotes, Footnotes Summary, Pop-up Dialog, Advanced Expand, Advanced Cards, Interactive Banner, Numbered Headings, Divider, Countdown Timer, User Profile, Status Macro, JSON Viewer, **Custom Fonts, News, Page Tree, Activity Stream, Number List, Form Macro, Markdown Renderer, HTML Renderer**, and more.

Visibility Rules

Target content to the right audience on the same page.

Includes:

- **Conditional Show:** Show content only to selected users or groups.
- **Conditional Hide:** Hide content from selected users or groups.

Use cases: internal notes on shared pages, role-based instructions, admin-only sections, staged rollouts.

Attachment Control Center

A global attachment dashboard - accessible globally - to manage files across your Confluence site.

Capabilities include:

- **Storage and file-type overview.**
- **Searchable attachment table** across spaces and pages.
- **Filtering** by space, file type, uploader, version & date range.
- **Preview, download, and admin-controlled deletion.**
- **Bulk actions** (download ZIP / bulk delete).
- **Deletion audit log** for accountability.

Built-in Page Templates

Create fully structured Confluence pages with a single click- all macros pre-configured, child pages created, and buttons automatically linked.

Available templates:

- **Team Hub:** A team space home page with a welcome header, vision & mission cards, photo-based member directory, resource cards, and helpful links. Creates two child pages automatically: **Meeting Notes and Ways of Working.**

Macros used:

[Background](#)[Buttons](#)[Advanced Cards](#)

- **Company Hub:** A company-wide intranet landing page with a 3-slide rotating banner, essentials panel, department directory (10 cards), HR FAQ accordion, team-in-action section, and social links.

Macros used:

[Interactive Banner](#)[Background](#)[Buttons](#)[Advanced Cards](#)[Advanced Expand](#)

- **Monthly Project Report:** A single-page monthly report with a report banner, project summary table, KPI target cards, key initiatives (tabbed), upcoming focus areas, and a team kudos section.

Macros used:

Interactive Banner

Background

Tooltip

Custom Tabs

Advanced Cards

How it works:

- **Access** templates from the app's global page.
- **Configure** the space, parent page, labels, and page title in the modal.
- **Click Create Page:** the main page and any child pages are created instantly with all macros pre-configured and ready to edit.

Use cases: new employee onboarding, company intranet homepages, team landing pages, department hubs, and any page that benefits from a consistent, professionally structured starting point.

3. Use Cases

• Documentation Hubs:

Product **documentation hubs**.
Process/playbook hubs.
Policy hubs.
"Start Here" onboarding hubs.
Release and rollout hubs.

• Controlled Visibility:

Internal guidance (team-only).
Hide sensitive sections.
Admin-only operation blocks.

• Attachment Governance:

Find large files fast.
Bulk download or clean attachments.
Track deletions via audit log.

• Cleaner and guided pages:

Onboarding: CTAs & progress.
Runbooks: Collapsible troubleshooting.
Resources: Cards & banners.
Pages: Inline help & references.

4. Quick Start

Step 1: Build a hub with Tabs Navigation

- Edit a Confluence page.
- Insert a tabs macro (example: Tab Parent Content Mapper).
- Select the content source (parent page / labels / selected pages).
- Publish and test in view mode.

Step 2: Upgrade the page with Formatting Macros

- Insert formatting macros where needed.
- Add structure using Background, Banner, and Card macros.
- Add actions using buttons.
- Control long content using Advanced Expand.
- Add a guided flow using a Progress Bar.

Step 3: Apply Visibility Rules

- Wrap content with Conditional show or Conditional hide.
- Select users/groups.
- Publish.
- Validate with another user role (recommended).

Step 4: Manage attachments globally

- Open Attachment Control Center.
- Use search and filters to find target files.
- Preview/download.
- Use bulk actions if needed.
- Review the deletion audit log. This is for admins.

How to Use the Macros - Step-by-Step Guide

All macros are used on your Confluence instance at <https://clovity-demos.atlassian.net/>. Follow the common steps below for every macro - each section also includes macro-specific configuration details.

Common Insertion Steps (applies to all macros)

1. Open your browser and go to <https://clovity-demos.atlassian.net/>
2. Select **any Space** from the left sidebar or Spaces menu.
3. Select **any Page** from that space.
4. Click the **Edit** button (pencil icon) to enter edit mode.
5. Place your cursor where you want the macro, then type / or click the + icon in the top toolbar → click **View More** → type the macro name.
6. Click the macro from the search results to **insert** it.
7. Configure the macro using the **settings panel on the right side** (see macro-specific settings below).
8. Click the **Save** button (top-right) or press **Ctrl + S**.
9. Click **Update** to publish the Confluence page
10. The inserted macro is now **visible on the page** in view mode.

Background: Add colored or image-based section backgrounds

1. Follow **Common Steps 1-6**-search for "**Background**" and insert.
2. In the right panel, set the **Background Color** using the color picker, or provide a **Background Image URL**.
3. Adjust **Padding** on the right side to control spacing inside the section.
4. Set **Border Radius** for rounded corners if desired.
5. Add your content (text, images, other macros) inside the Background macro body.
6. Follow **Common Steps 8-10** to save and publish.

Custom Fonts: Apply custom typography to a text block

1. Follow **Common Steps 1-6**-search for "**Custom Fonts**" and insert.
2. In the right panel, choose the **Font Family** (e.g., Inter, Roboto, Montserrat).
3. Set the **Font Size** and **Font Weight** (Regular, Bold, etc.).
4. Pick a **Font Color** using the color picker.
5. Enter your **Text Content** in the macro body.
6. Optionally set **Line Height** and **Letter Spacing**.
7. Follow **Common Steps 8-10** to save and publish.

Button: Add styled call-to-action buttons

1. Follow **Common Steps 1-6**-search for "**Buttons**" and insert.
2. In the right panel, enter the **Button Label** (text shown on the button).
3. Set the **Link/URL**-internal Confluence page or external URL.
4. Set the **Button Size**: Small, Medium, or Large.
5. Optionally toggle **Open in New Tab** for external links.
6. Click + **Add Button** to add multiple buttons in a group.
7. Follow **Common Steps 8-10** to save and publish.

Advanced Cards: Display rich content in card grid layouts

1. Follow **Common Steps 1-6**-search for "**Advanced Cards**" and insert.
2. In the right panel, set the **Card Layout**: 2-column, 3-column, or 4-column grid.
3. For each card, enter the **Card Title, Description**, and optionally an **Image URL**.
4. Set the **Destination** to make the entire card clickable (internal or external URL).
5. Choose a **Card Style**: Hide card border or not.
6. Click + **Add Card** to add more cards.
7. Follow **Common Steps 8-10** to save and publish.

Advanced Expand: Create styled collapsible sections

1. Follow **Common Steps 1-6**-search for "**Advanced Expand**" and insert
2. In the right panel, enter the **Expand Title** - the clickable heading users see when the section is collapsed.
3. Choose the **Icon Style**: chevron, plus/minus, or arrow.
4. Set the **Header Background Color** and **Text Color** for the title bar.
5. Add your content inside the macro body.
6. Follow **Common Steps 8-10** to save and publish.

Form Macro: Collect structured user input directly on the page

1. Follow **Common Steps 1-6**-search for "**Form Macro**" and insert.
2. In the right panel, enter a **Form Title**.
3. Choose from Add Field - Text, Textarea, Dropdown, Checkbox, Radio, Date, or File Upload.
4. For each field, set the **Field Label**, mark **Required** if needed.
5. Follow **Common Steps 8-10** to save and publish.

Tab Parent Content Mapper: Auto-generate tabs from a parent page's children

1. Follow **Common Steps 1-6**-search for "**Tab Parent Content Mapper**" and insert.
2. In the right panel, click **Select Parent Page** search for the Confluence page whose direct child pages will become tabs.
3. Choose the **Tab Display Style**: Horizontal Tabs or Dropdown menu.
4. Set the **Default Active Tab** (first tab is the default).
5. Follow **Common Steps 8-10** to save and publish.

Conditional Show: Display content only to specific users or groups

1. Follow **Common Steps 1-6**-search for "**Conditional Show**" and insert.
2. In the right panel, click + **Add Users / Groups** - search and select who should see this content.
3. Add your restricted content inside the macro body.

4. Follow **Common Steps 8-10** to save and publish.
5. Validate by viewing the page as a different user role to confirm visibility.

Interactive Banner: Full-width announcement and rotating hero banners

1. Follow **Common Steps 1-6**-search for "**Interactive Banner**" and insert
2. For image backgrounds, select an attachment from the **local storage**.
3. Enter the **Heading Text** and **Sub-heading/Body Text** for the banner slide.
4. Optionally add a **CTA Button** set the label and link URL.
5. For a **rotating carousel**, click + **Add Slide** and configure each slide. Set the **Auto-Play Interval** (seconds).
6. Follow **Common Steps 8-10** to save and publish.

Footnotes: Add inline reference notes to page content

1. Follow **Common Steps 1-6**-search for "**Footnotes**" and insert at the point in the text where the reference marker should appear.
2. In the right panel or inline editor, enter the **Footnote Text**- the reference content shown at the bottom or in a tooltip.
3. The macro automatically inserts a **superscript number** [1], [2], etc. at the cursor position.
4. Repeat for each additional footnote - numbers increment automatically.
5. To collect all footnotes in one place, separately insert the **Footnotes Summary** macro at the bottom of the page - it auto-collects all entries.
6. Follow **Common Steps 8-10** to save and publish.

Instance URL

All macros are available on: <https://clovity-demos.atlassian.net/>

Select any space open any page click Edit use/ or + icon View More search macro name - insert → configure → save update

5. Recommended “Starter Setup” (Most Customers)

For a standard documentation hub

Tabs Navigation: Parent Content or Labels.

Layout: Tabs (switch to Dropdown if large list).

Add Buttons: Start Here / Setup / FAQ.

Add Background blocks to create visual sections.

Add Advanced Expand for FAQs and troubleshooting.

Add Cards for resource links.

Add Progress Bar for onboarding or multi-step docs.

Add Conditional show / Conditional hide to reduce clutter by audience.

Use Attachment Control Center monthly for cleanup.

Key Benefits for Customers

- **Less clicking:** guided hubs reduce page-tree hunting.
- **Less maintenance:** hubs update automatically when content changes.
- **Cleaner pages:** structured layouts improve readability and adoption.
- **Interactive experience:** dialogs, expandable sections, banners, cards, and CTAs.
- **Audience targeting:** reduce clutter without duplicating pages.
- **Attachment control:** find, filter, bulk manage, and audit deletion actions.

Supported Macros at a Glance

Macro	Purpose
Tab Parent Content Mapper	Tabs from a parent page's child pages
Tab Label Content Mapper	Each page tagged with your entered label becomes a tab
Tab Page Mapper	Tabs from manually selected pages
Custom Tabs	Manual rich-content tabs
Conditional Show	Show content to specific groups
Conditional Hide	Hide content from specific groups
Buttons	Styled CTA buttons
Background	Section background color/image
Alert	Info, Warning, Error, Success banners
Tooltip	Hover-to-reveal definition/st
Progress Bar	Multi-step page workflow tracker
Footnotes	Inline reference notes
Footnotes Summary	Consolidated list of all footnotes on a page
Pop-up Dialog	Modal overlays

Macro	Purpose
Advanced Expand	Styled collapsible sections
Advanced Cards	Rich content cards with layout
Interactive Banner	Full-width announcement banners
Numbered Headings	Auto-numbered heading hierarchy
Divider	Styled horizontal rules
Countdown Timer	Live event countdown
User Profile	User profile cards (up to 30 per macro)
Status Macro	Color-coded status badges
JSON Viewer	Formatted JSON display
Custom Fonts	Styled text block with custom typography
News	Display latest Confluence blog posts
Page Tree	All pages of the current space in a navigable list
Activity Stream	Recent page activity from a selected space
Number List	Styled numbered lists (1,2,3 / A,B,C / I,II,III)
Form Macro	Collect structured user input through forms
Markdown Renderer	Render Markdown content inside Confluence
HTML Renderer	Render custom HTML content inside Confluence
